

## Annex II – 7

### Progress and Constraints

Main progress in recent years (legislation, policies, infrastructure, investments, training, etc.)
<ol style="list-style-type: none"><li>1. Taxonomic training specific pests: <i>Globodera roschiensis</i> (Potato cyst nematode), 3-27 February 2009.</li><li>2. Molecular diagnostic training – Virology, 12 October -4 December 2009.</li><li>3. Molecular diagnostic training – Bacteria and fruit fly, 12 October -4 December 2009.</li><li>4. Workshop on Fungi and Bacteria Associated with seed, 21-27 October 2009.</li><li>5. IAEA/RCA Regional Training course 2009 on the use of irradiation as a phytosanitary application for economically important fruit, 23-27 February 2009</li><li>6. Regional workshop on phytosanitary inspection and phytosanitary certification, 27-31 July 2009.</li><li>7. Workshop on inspection techniques of pest and diseases, 26 February 2009.</li><li>8. Pest, Plant Inspection, Regulations and Import Requirements of the Importing Countries, 19-20 March 2009.</li><li>9. Fumigation Technique for Perishable Commodities Theories and Practices 23-24 May 2009.</li><li>10. Phytophagous mites and their control, 9-10 April 2009.</li><li>11. Importation of Prohibited Articles Imported for Commercial under Plan Quarantine Act B.E.2507, amended by 2<sup>nd</sup> revision B.E.2542, amended by 3<sup>rd</sup> revision B.E.2551, 20-22 April 2009.</li><li>12. Insect and zoological pest and their control 20-24 April 2009.</li><li>13. Technical operation under Plant Quarantine Act B.E.2507, amended by 2<sup>nd</sup> revision B.E.2542, amended by 3<sup>rd</sup> revision B.E.2551 17-19 June 2009.</li><li>14. Workshop on pest risk management of imported and exported vegetables and fruits, 24-26 June 2009.</li><li>15. Collecting and identification of some sucking insect pests on imported plants and plants intended for export, 19-21 October 2009.</li><li>16. Workshop on fungi and bacteria associated with seed, 21-27 October 2009.</li><li>17. Molecular diagnostic training – Virology, 27 September – 20 November 2010.</li><li>18. Workshop on Remote Microscope as a tool for plant pest diagnosis, 22-25 March 2010.</li><li>19. Workshop on Molecular Techniques as a tool for plant pest diagnosis, 25-30 March 2010.</li><li>20. Taxonomic training specific pests: Bacteria, 3-27 February 2010.</li><li>21. Thermal treatment for the disinfestations of fruit flies, 11 May – 4 September 2010.</li><li>22. Workshop on phytosanitary risk management strategies and operational options for market access, 28-30 November 2010.</li><li>23. APEC workshop on enhancing food security through a regional approach and wide stakeholder participation in plant biosecurity, 1-3 December 2010.</li><li>24. Surveillance of important plant disease on exportation and importation commodities, 22-25 June 2010.</li><li>25. Plant Inspection, Regulations and Import Requirements of the Importing Countries, 17-18 March 2010.</li><li>26. Fumigation Technique for Perishable Commodities Theories and Practices, 27-28 April 2010.</li><li>27. Surveillance of <i>Radopholus similes</i> in Aquatic Plant and Ornamental Plant, 24 June 2010.</li></ol>
Main constraints (personnel, infrastructure, administrative, operational, training, etc.)
Skilled personnel, SPS capacity building, PQ treatment facilities, communication network (international and domestic), diagnosis facilities, and administrative.
