

WORKSHOP PROGRAM AND EXPECTED OUTCOMES

YUSOF OTHMAN

PRESENTATION OUTLINES

- ❖ INTRODUCTION
 - ❖ OBJECTIVES
 - ❖ WORKSHOP PROGRAM
 - ❖ COUNTRY PRESENTATION
 - ❖ SALB OPERATIONAL PLAN FOR PFA
 - ❖ APPPC SALB REGIONAL WORK PLAN
 - ❖ OUTCOMES
- 

INTRODUCTION

- ❖ The workshop to developed import guidelines on SALB started in 2010 after the PRA of rubber was adopted at the 25th Session in 2007 in Beijing, China and Regional Standard on protection against SALB was adopted at the 26th session 2009 in New Delhi India.
- ❖ Workshop on SALB training module was conducted in 2011
- ❖ Workshop on Training the master Trainers in 2012
- ❖ Proposed Diagnostic Training on SALB was plan in 2014 but only could be conducted in mid 2015
- ❖ Training on the implementation of Biosecurity implementation of SALB in 2014 but defer to January 2015

OBJECTIVES

- ❖ To train and establish core group in implementing the SALB PRA and Standard in rubber growing countries of the APPPC region;
- ❖ To harmonise and standardise the collection of SALB surveillance data based on ISPM 6, maintaining Pest Free Area as in ISPM 4 and sharing with APPPC rubber growing countries through p-tracker in fulfilling the pest reporting obligation
- ❖ To gather feedback on the use of SALB reference materials for in country training and status on translation to local language
- ❖ To provide the opportunities for participating officers to share knowledge and gain expertise from experts in this field;

WORKSHOP PROGRAM

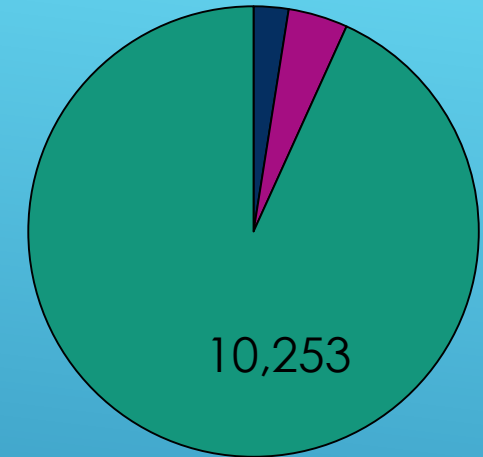

- ❖ Opening and introduction of participants
- ❖ Information on impact of SALB PRA and Regional Standard on Trade
- ❖ Surveillance system for PFA
- ❖ P-Tracker for Surveillance Tools
- ❖ Field trips
- ❖ Country Report on the implementation of SALB Biosecurity
- ❖ Presentation on Proposed Country Surveillance system for SALB

COUNTRY PRESENTATION

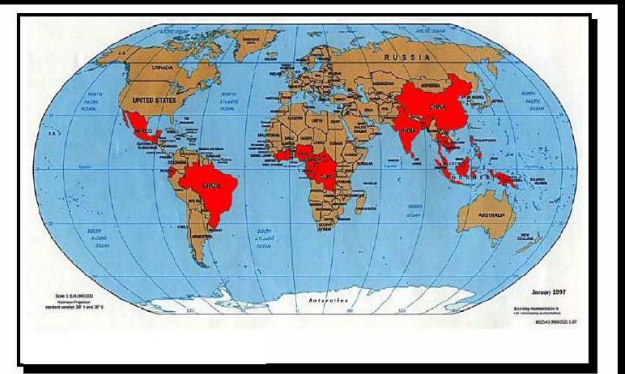

- ❖ Status of rubber industry in each country
- ❖ Readiness of each Asia Pacific rubber growing countries to mitigate SALB introduction
- ❖ Surveillance system for PFA
- ❖ Sharing of Information
- ❖ Usage of training modules and training program in each country
- ❖ Diagnostic capability on SALB

Total = 10,977 (2011)

NATURAL RUBBER PRODUCING COUNTRIES

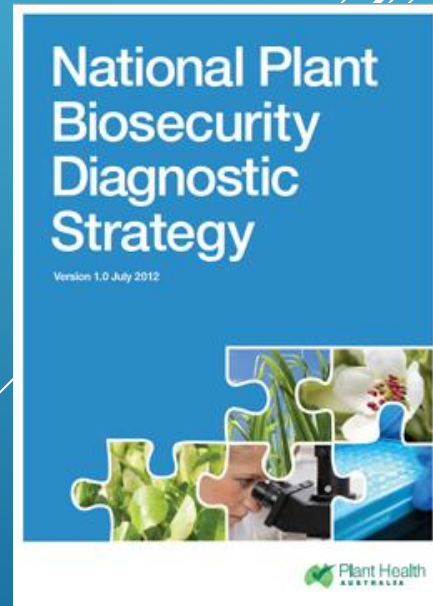

REGIONAL SALB SURVEILLANCE SYSTEM OPERATIONAL PLAN FOR ESTABLISHING AND MAINTAINING PFA

- Will be divided in 3 groups and discuss the regional SALB Surveillance operation work plan
- Suggest title and coordinating agency(s)
- Who will coordinate in each country
- Target Area
- Time frame
- What information will be collected
- Reporting mechanism and sharing of information

APPPC Regional SALB Work Plan

- List of commodities to be imported from SALB countries other than rubber and rubber products
- Preparedness in Legislation on import requirements
- Capacity on establishing and maintaining PFA
- Capacity building on diagnostic for detection and screening analysis
- List the activities to be proceed and expected outcomes

EXPECTED OUTCOMES

- ❖ To harmonise and standardise the import requirements of agriculture products from SALB infested countries;
- ❖ To conduct surveillance on SALB, establish and maintaining Pest Free Area and share these information through the IPPC Portal;
- ❖ To convey information to the higher management level to conduct SALB activities and review the APPPC Schedule;
- ❖ To review and update on the reference materials from in country training feedback
